Restoration Project Management

Command The Chaos

April 8-13, 2019

See Back for Details

Canton, OH

Overview

Project Managers face unique situations in the restoration industry and bear the burden from beginning to end. While some thrive on adrenaline and others survive on instinct, the good ones succeed through flawless execution.

Restoration Project Managers must to be able to close deals, plan efficiently, communicate effectively, delegate accordingly, and fully comprehend the roles and responsibilities for which they are responsible. In order to understand how to apply these skills to restoration, Violand Management Associates (VMA) offers Violand's Restoration Project Management program—the benchmark for restoration project management training in the industry.

This training program focuses on developing the fundamental behaviors necessary to sell, estimate, and manage a restoration project. VMA started with the principles of project management and tailored them to the unique challenges found in today's restoration business. The end result is advanced level learning meets real work experience. VMA partnered

with Kent State University to bring in academic authorities along with experts in the restoration industry who take

project management from principle to application. Graduates of this program will understand and display a higher standard of performance in restoration project management. This standard is what drives production, symbolizes professionalism, and weeds out the competition.

Investment and Return

The typical Project Manager in a restoration company manages approximately \$1-1.5 million in projects annually. VMA estimates that graduates of this program will increase their capacity and profitability by at least 5%, yielding \$50,000 to \$75,000 in improved performance within the first year alone. The return on investment is huge and immediate, especially given the affordable cost of the program. In addition, the successful completion of Violand's Restoration Project Management program meets the Project Management Institute's educational requirements to apply for the Project Management Professional (PMP®) certification and counts as a prerequisite for the CR® and WLS® certifications.

REASONS WHY PROJECTS FAIL

- Failure to Define Objectives
- NO Quality Control**
- Inadequate Control of Resources
- Lack of Communication
- LACK OF PLANNING**
- Peer Management

“The skills I learned from this week will continue to develop and last for my entire career. The professionals are top notch. You can't find this type of training anywhere else.”

Jon Stapel, Operations Manager
Menold Construction & Restoration

Format

Violand's Restoration Project Management program contains over 50 hours of training condensed into three weeks: two weeks of webinars and one week of classroom instruction at Kent State University, concluding with a 200-answer exam. Upon passing the exam, graduates receive a Certificate of Restoration Project Management from Kent State University and Violand Management.

“Violand's Restoration Project Management Program helped me plan my jobs and keep them on schedule. Extremely beneficial!”

Adam Simone
General Manager
RestoreCore, Inc

“I can't help but think of all the lost money and headaches not knowing this information has cost me!”

Jeremy Hongslo
Owner
TCM Restoration & Cleaning

If a company has an employee quit their job within 365 days of completing a Violand professional training program, Violand Management will extend a free seat to the company for the same class to be attended within the next 365 days.

Successful completion of this course qualifies for:

43.25 Contact Hours from RIA

Meeting educational requirements to apply for PMP® certification

2 CECs from IICRC

A prerequisite for the WLS® and CR® certifications

About the Presentors

Peter Berman has over a dozen years of experience in construction, development, and inspection. He is the CEO of The Ruby Group and a founding partner of Inspect Your Home, Inc, which has performed inspections for some of the largest national Real Estate Holding companies and lenders, including Legg Mason, Wells Fargo, and GMAC.

Mickey Lee, WLS has nearly 30 years' experience in construction and restoration of residential, commercial, retail and industrial structures. He is involved in RIA, IICRC, ASHRAE and other organizations, most recently leading the development of the IICRC Commercial Drying Specialist (CDS) certification as committee chair.

Edward H. Cross is President of Law Offices of Edward H. Cross & Associates, PC and has been litigating business, real estate, and property damage cases since 1995, specifically matters related to water, sewage, and mold. He is a Certified Indoor Air Quality Consultant (CIAQC), a Certified Indoor Air Quality Professional (CIAQP), and Water Damage Restoration (WRT) by the IICRC/ The Clean Trust.

Steve Toburen spent over 20 years "down in the trenches" in the cleaning and restoration industries and graduated first in his Certified Restorer class. His cleaning and restoration company grew into a nationally recognized operation based on its high per-capita profits in a smaller market base. Steve serves as the Director of Training for Jon-Don's Strategies for Success (SFS) program and directs the SFS website.

Bob Jewell, PMP is a consultant, facilitator, and author whose mission is to inspire a passion for excellence in the areas of project management and leadership. His 35 years of real-world business experience, combined with his humor and facilitation skills, creates a dynamic learning environment. He is the author of "Pursuing Project Excellence: Six Ideas to Improve Your Projects."

Jack Shanks, owner of Management Solutions, has more than 30 years of broad-based management experience in private business, government and education. He is an experienced project manager, negotiator, and coalition builder who has created and taught seminars throughout the United States for more than 20 years. Jack also served as a lead negotiator for General Electric.

Timothy E. Hull, CR is a leading expert on operations and organizational development in the restoration and cleaning industries. Tim is currently the Director of Operations and a Business Development Advisor for Violand Management, working one-on-one with owners, managers, and key employees.

Scott Tackett is recognized as a leading authority in human resources, organizational development, and organizational leadership in the restoration and cleaning industries. Scott is also a facilitator, business trainer, and adjunct professor for Kent State University.

Violand Management Associates, LLC is a consulting firm that works internationally helping entrepreneurial companies achieve sustained profitable growth. For more information, visit our website at violand.com or call +1 800 360 3513.
